

Salicylic Gel Peels

OVERVIEW

These exfoliating peels target breakouts, eliminate blackheads, whiteheads, and help clarify the skin. Infused with extracts to reduce inflammation and soothe, they are designed to remove impurities from blemished skin without causing further irritation.

BENEFITS

- Salicylic acid, a beta-hydroxy-acid, is able to reach deeper into the pores compared to AHAs. This helps clean pores more effectively and is best for acne, blackheads, and whiteheads. Its impressive pore cleansing abilities remove sebum and dead skin cells to allow new skin cells to regenerate and thrive.
- Salicylic acid is oil-soluble which makes it ideal for the acne-prone. It reduces oiliness, redness, puffiness, and pore build-up since it is able to penetrate through the oil unlike its AHA counterpart. This aids in reducing sebaceous follicle blockage to help reduce the occurrence of future breakouts.
- Tea tree oil has been proven effective in reducing acne bacteria and is a natural alternative to benzoyl peroxide. It is an essential oil extracted from the leaves of the *Melaleuca Alternifolia* tree native to Australia. It has been shown to have powerful antifungal and antibacterial effects that make it a prime ingredient for helping kill bacteria.
- Green tea extract is known for its soothing, anti-inflammatory benefits that come from its natural polyphenols, or naturally occurring plant chemicals. It has been shown to be anti-bacterial and can help clarify blemished skin. Green tea contains a powerful antioxidant compound called EGCG, which can help fight UV damage and is also a potent anti-aging ingredient.
- Comfrey extract contains naturally occurring healing compounds (allantoin and rosmarinic acid) to assist in wound repair and to reduce inflammation.
- Cucumber is a non-sensitizing, antioxidant filled extract that promotes anti-aging benefits. Silica helps oxygenate the skin and vitamin C has been effectively shown to brighten the skin.

Ingredients

Propylene Glycol, Salicylic Acid, SD Alcohol, Octoxynol 10, Polysorbate 20, *Melaleuca Alternifolia* (Tea Tree) Leaf Oil, Hydroxyethylcellulose, *Cucumis Sativus* (Cucumber) Fruit Extract, *Camellia Sinensis* Leaf (Green Tea) Leaf Extract, *Matricaria Recutita* (Chamomile) Flower Extract, *Symphytum Officinale* (Comfrey) Leaf Extract, Phenoxyethanol, Ethylhexylglycerin

Main Ingredients

Salicylic Acid
Tea Tree Oil

Performance Ingredients

Green Tea
Chamomile
Comfrey
Cucumber

Available Sizes

1 fl oz. € 30mL

Available Strengths

Salicylic 10%, Daily-use - pH 3.5
Salicylic 20%, Level 2 - pH 2.1-2.5
Salicylic 25%, Level 3 - pH 2.2-2.4
